

## menon group CORPORATE OVERVIEW

### we leverage your centricity enterprise solution

The Menon Group creates value-added applications for GE Centricity® Enterprise customers. Our products let you perform medication reconciliation at any time, document electronic progress notes quickly, summarize patient status at shift turnover, extract patient records as PDF files, and more. Over the last decade, we have earned our reputation for agility by engineering intelligent solutions to the variety of IT challenges our customers face. Today, more than two-thirds of Centricity Enterprise customers use our applications.

#### PRODUCTS AND CUSTOM APPLICATIONS

At the Menon Group, we pride ourselves in tackling complex challenges and engineering simple, extensible applications that make your overall solution more robust and effective. The result is a portfolio of products that includes both ready-to-use applications and custom solutions that span a variety of needs on the Centricity Enterprise and HP NonStop platforms.

Many of our products began as a custom solution for a specific customer. Given that many customers share similar challenges, these custom solutions typically become part of our standard product portfolio. For example, when an academic medical center needed a fast and convenient way for physicians to write progress notes electronically, they called upon the Menon Group to develop *Progress Notes*, which is now available to Centricity Enterprise users. Another example is a specialized Bilirubin Graph designed specifically to facilitate monitoring of infant bilirubin levels. For a complete list of our products, please see the back of this sheet or visit our web site at [www.menongroup.com](http://www.menongroup.com).

#### OUR CUSTOMERS

Our philosophy has always been to build long-term relationships with our customers. To that end, our solutions are rigorously engineered to assure that they serve our customers' needs for years to come. Our commitment to quality and service is evidenced in the number of Centricity Enterprise organizations that count on Menon Group applications every day.

#### what does your organization need?

- Augment GE Centricity® Enterprise capabilities
- Leverage investments in systems and technology
- Address JCAHO and Meaningful Use initiatives
- Satisfy users with intuitive, browser-based applications
- Bridge multiple platforms and technologies
